

Millers and Pavers

NO MORE PAVING AROUND MANHOLES

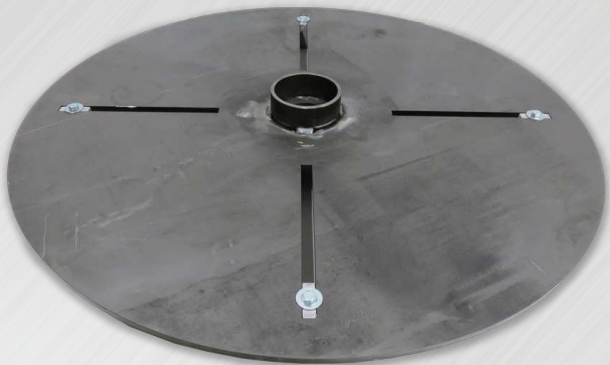

Manholes are a major inconvenience when you are milling and paving. That's why we have developed our Cut, Pull, and Plate package. Designed specifically to make milling and paving quicker and easier. This system allows your team to temporarily replace manhole frames with a steel plate then mill and pave over them.

THE PROCESS

- ✓ *Cut and remove the manhole frame from the road*
- ✓ *Replace the frame and lid with a custom steel plate*
- ✓ *Cover the steel plate with asphalt*
- ✓ *Mill and pave with no obstructions*
- ✓ *Cut through the new asphalt and remove the steel plate and all road materials with no labor*
- ✓ *Restore the manhole to grade*

NEWCON PLATE
