Save space and time. Simply fold for easy transport!

The design of the Mr. Manhole Debris Shield makes transport a breeze! It deploys quickly and easily. Simply unfold, set up and get to work within minutes. Position the custom shield in the way that works best for your job. You can use it to completely encircle the cutter or open one side and drive the skid loader in the opening.

Cutting Asphalt can become dusty and dangerous with the flying debris. The shield design and functionality allows you to minimize the risk of flying debris as well as avoiding dust on your clothing.

The Mr. Manhole exclusive Debris Shield was designed with you in mind, not only will it make your manhole restoration and replacement cutting process safer and faster, we've added a smart design to make your brand stand out and get noticed. The manhole branded debris shield fully displays the warning labels and the internationally recognized Mr. Manhole brand! When people see you on the job site, they know you're all about excellence.

Smarter, Faster & Safer!
